**Abstract:** This document reports on GridLab Deliverable 1.4 (Prototype GAT implementation and User's Guide).

## 1 Prototype GAT Implementation and User's Guide

As of month 18, the month in which D1.4 "Prototype GAT User's Guide" was due, D1.4 did not exist as a deliverable. This is due to the fact that it was not in the original annex, which at the time was in full force. However, around month 18 the annex was revised to include D1.4, "Prototype GAT User's Guide." But, this new annex was not ratified until a few weeks ago. Hence, WP-1 did not know if the deliverable D1.4, "Prototype GAT User's Guide," was actually a deliverable until about 8 months after it was due. Thus, WP-1 did not complete the deliverable D1.4 "Prototype GAT User's Guide."

WP-1 instead is currently focusing documentation efforts on producing the "GAT User's Guide," which is part of D1.6 and due in month 36. WP-1 has also decided that it would be counter-productive at this late date to produce a user's manual for the prototype GAT, as this prototype version of GAT was for internal use only. The prototype GAT allowed WP-1 to face, in a concrete manner, the various problems which would be encountered in producing the production version of GAT. Furthermore, as the production version of GAT is reaching completion, the prototype version of GAT is no longer used internally or externally. Hence, producing a user's manual for such will serve no purpose other than to slow the production of D1.6 which contains the user's manual for the production version of GAT, the version of GAT which will be released to the public.
